

**WE ARE THE
GENERATION
THAT CAN
BEAT MALARIA**

**TODAY MALARIA IS A
SERIOUS PUBLIC HEALTH PROBLEM**

50%

50% of the world's
population at risk

216 million malaria
cases per year

445,000 deaths per year
including 91% in Africa

A child dies of malaria
about every 2 minutes

BUT WE HAVE THE POWER TO CHANGE THAT:

- **To our leaders:** Let's ensure that malaria programs are **fully funded** in a sustainable way and that **everyone have equal access to malaria lifesaving tools and services** including the most vulnerable populations and the one living in remote areas;
- **To civil societies organizations working on malaria:** Let's work smarter, better and stronger ; the CS4ME network will provide a platform where CSOs can coordinate efforts, support peers and lead regional and local campaigns;
- **To our communities:** Let's **ensure that every child, every pregnant woman, everyone in the family is protected** from the mosquito bites that transmit malaria by **sleeping under a treated mosquito net** and **keeping our environment clean and free of stagnant water.**
